

KARCAN Kesici Takım

Environmental Policy

Aware of the responsibility of building a sustainable future, KARCAN adopts as its fundamental principle minimizing environmental impacts in all its activities and managing natural resources in a way that leaves a livable world for future generations.

In line with this fundamental principle, we commit to taking the following steps for a cleaner and more sustainable environment:

- To fully comply with all environmental legislation, regulations, and directives; to consider current environmental standards not merely as a minimum threshold but to go beyond these standards whenever possible, and to proactively follow new legal requirements, taking necessary compliance steps in a timely manner,
- To always consider the environmental factor as a priority in all our current activities and future investments,
- To use energy and natural resources in the most efficient way; to invest in renewable energy sources and implement energy efficiency projects to reduce energy consumption,
- To prevent pollution, to minimize the waste arising from our activities at the source; to prioritize separation, recycling, and reuse practices, and to ensure the disposal of hazardous waste with minimized environmental impact by managing it through licensed companies in accordance with the relevant legislation,
- To raise all our employees and suppliers to the highest level of consciousness regarding our environmental responsibilities; to make environmental awareness an integral part of our corporate culture by providing regular training to our employees, and to support the adoption of this environmental consciousness not only in the workplace but also as everyone's daily life philosophy.

We, as the management and employees of KARCAN, pledge to fulfill these commitments.
