Information Security Policy

As KARCAN, protecting the confidentiality, integrity, and availability of all our corporate information assets related to the products and services we offer is one of our fundamental priorities. Our information and data security strategies are in full alignment with our corporate objectives.

In this context, KARCAN commits to implementing the principles stated below:

- To protect our information assets against all kinds of threats, whether internal or external, intentional or unintentional; to methodologically conduct information security risk assessments by identifying our processes and information assets, and to reduce risks to acceptable levels,
- To prevent information from falling into the hands of unauthorized persons, to protect the accuracy and completeness of information against unauthorized modifications, and to ensure that information is seamlessly accessible whenever required by business processes,
- To fully comply with national and international legislation and legal regulations we are subject to, and all legal information security obligations arising from contracts made with our stakeholders,
- To develop, implement, and regularly improve business continuity plans in order to ensure the uninterrupted continuation of our operations and essential services in the event of a possible disaster or interruption,
- To manage information security in an integrated manner with business needs; to organize trainings that will increase the information security awareness of our employees, and to ensure that compliance with the Information Security Policy is a mandatory requirement for all our employees and relevant third parties.

We, as the management and employees of KARCAN, pledge to fulfill these commitments.
